

lifeskills GO

Release Guide: Version 2023.07.01
25th August 2023

lifeskills GO

Our Vision:

Every child has access to an effective, measurable and affordable social, emotional and physical education.

Our Mission:

To globally empower educators to prioritise, support and measure the development of social, emotional and physical literacy for our next generation of leaders.

We are pleased to announce the release of **Life Skills GO** Version 2023.07.01, which reflects our continuing commitment to meet the evolving needs of our Schools, Teachers and Students.

This release includes merging the check-in page and class dashboard, greater visibility over student journal entries and improvements to our help menu.

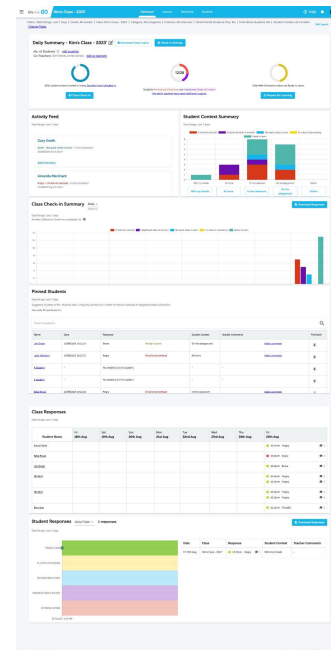

We strongly encourage your feedback so please always feel free to contact us at product@lifeskillsgroup.com.au with improvement suggestions or ideas.

The Dashboard and Check-in pages combined

We have moved all additional data visualisations from the Check-in page to the Dashboard, improving the visibility and access to student data. The new cards that now appear on the dashboard are the Class Responses table and Student Responses Graph. This will allow teachers to review different sets of data in the one place and decreases confusion for new users.

You can customise the layout of your dashboard to put the information you find most relevant at the top of the page. Learn how to rearrange your dashboard here: [Customise your Dashboard Layout](#).

Benefits

Ease of Use

Accessibility

Visibility

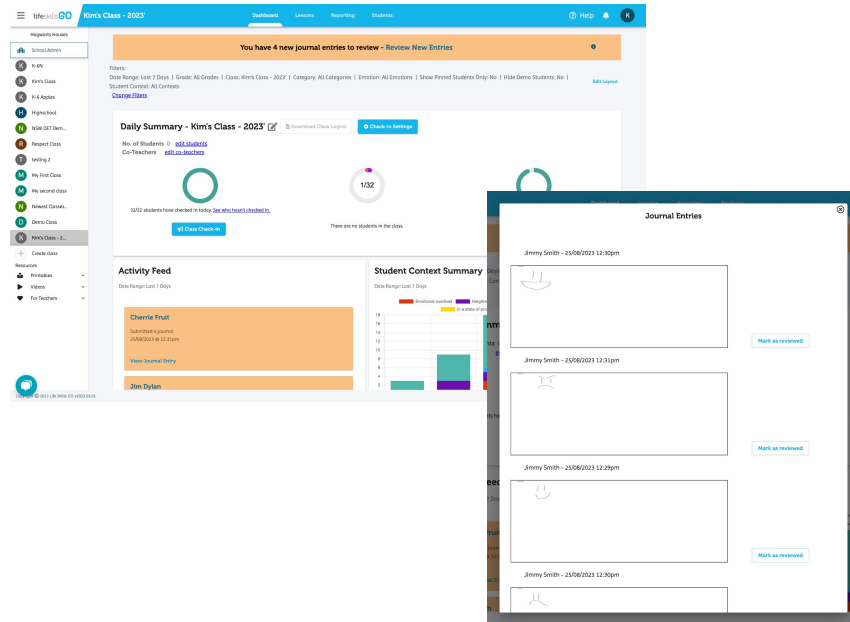

Confusion

Notification for new journal entries

To increase visibility over journal submissions and decrease time taken to find student work, teachers will now see a **notification at the top of their dashboard** when new journal entries are available for review. Teachers can then mark the entries as reviewed to dismiss the notification or download the entries if needed.

Please note that only journal entries submitted after 25th of August will appear in the notification. For all other entries, teachers will find these in the activity feed and individual student profiles.

Benefits

Ease of Use

Visibility

Time

Frustration

Visualise check-in data by different time periods

Educators can now filter the **Class Check-in Summary** and **School Check-in Summary** by different periods of time to better identify patterns or changes in the emotions of their students throughout a day, week, month or year.

Educators can break down the data: hourly, by lesson sessions (before 9, 9-11, 11-1, 1-3, after 3), daily, weekly and monthly.

Please note: To ensure that the data is still readable when viewing the Check-in Summary, we have limited the frequencies you are able to apply for specific date ranges. To view data by different frequencies, change the date range at the top of the page.

Improving our users' access to helpful resources

To support users in accessing our help guides and support documentation we have made minor changes to our help menu:

- The ? icon that represented the help menu has now been updated to display as “? Help” so that it is clear where users can find platform support.
- Our **Implementation Guide** is now included in the help menu for ease of access
- The **Quick Start Video** has been separated into a playlist of shorter help guides so that educators are able skip to the part most relevant to their current needs.

Other updates

- For new schools, we have updated the **Whole School Upload** with instructions to make the setup process as seamless as possible.
- We have made improvements to platform responsiveness and speed to enhance the experience of all users.
- Structural updates are part of an ongoing process to help us provide you with a platform that is stable and secure. We routinely update our systems and processes to do the same so that our customers get the best service possible.
